

**Notes:**

- Check architect's plans for the type of flashing to be used
- Check fixing centres and edge distances
- If top fixings are to be hidden by the Z flashing they will need to be fixed and sealed before the flashing is installed
- Cut edges need to be primed
- When 50 year durability is required refer Table 20 E2/AS1
- The flashing to be placed in the centre of the floor joists. Do not fix CLD™ Structural Cavity Battens or cladding into floor joists
